

Smart Automation

Maximize productivity in your automation applications

With automation playing a major role in the drive towards widespread AIoT adoption, maximizing productivity while minimizing downtime is a key requirement when choosing embedded SSDs for automation applications.

Zero downtime

Corner Bond & Anti-sulfur technology to withstand rugged conditions 24/7.

Enhanced efficiency

112-layer 3D NAND flash features 50% higher I/O performance.

Stable supply

Fixed BOM & product lifecycle management (PLM) to maintain long-term product supply.

Featured Products

PCIe M.2 2280

MTE720T

PCIe M.2 2280

MTE712A-I

PCIe M.2 2242

MTE470A

SATA III M.2 2280

MTS970T

SATA III mSATA

MSA470T
